

Charging Solutions for Communities

Smarter, Safer Charging for Golf Carts and LSVs

One Less Thing to Manage

Golf carts and LSVs are increasingly part of everyday transportation in residential communities. But plug-in charging still depends on residents or staff remembering to connect vehicles correctly.

Across private garages, shared parking areas, and outdoor spaces, that can create inconsistency, clutter, wear, and unnecessary safety concerns.

The Hidden Costs of Plug-In Charging

Inconsistent Charging

Vehicle readiness depends on individual charging habits and missed connections.

Cables in Shared Spaces

Cords across garages, sidewalks, and driveways can create clutter and trip hazards.

Outdoor Exposure

Plugs, connectors, and outlets are exposed to weather, debris, and repeated handling.

Wear and Replacement Costs

Repeated use and accidental damage wear out cables, connectors, plugs, and vehicle charging ports.

Charging That Happens Automatically

The WiTricity AI Tech MR/1™ eliminates the need to manually connect a vehicle.

Park over the Power Hub and charging begins automatically – indoors or outdoors, with no plugs, exposed contacts, or added steps.

Parking becomes charging.

Built for the Way Communities Operate

Works in Private or Shared Spaces

The MR/1 fits garages, designated parking areas, and shared community vehicle locations.

Keeps Vehicles Ready

Charging begins whenever a vehicle is parked correctly, helping improve availability for residents and staff.

Cleaner, Safer Spaces

Removing charging cables reduces clutter and trip hazards. Power Hubs can also be installed flush with the surrounding surface.

Designed for Outdoor Use

Wireless charging avoids exposed plugs and connectors while supporting reliable indoor and outdoor operation.

Supports Battery Performance

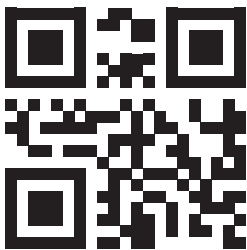

Opportunity charging can support battery health and extend service life, particularly for lithium-ion systems.

Less to Maintain

With no moving parts or scheduled maintenance, the MR/1 is built for dependable long-term use.

Works Across Community Fleets

The MR/1 supports golf carts, NEVs, LSVs, and maintenance vehicles using lead-acid or lithium batteries.

Ready to Simplify Charging?

Simplify charging for residents and staff while keeping community vehicles ready when needed.
